Index for Volume 8

Authors

A

Anderson, Robert F. 55

B

Bannister, William J. 80
Barton, J. A. 113
Britton, Lawrence 177
Bruderer, R. E. 141, 152
Brummel, Roger N. 228

C

Cantrell, G. L. 3
Capraro, M. A. 189
Carnegie Richard N. 92
Cholin, John 12
Clare, George H. 19
Craig, L. W. 35
Crowl, Daniel A. 225
Cullen, J. G. 73

F

Fauske, Hans K. 19, 181
First, K. E. 40
Fisher, Harold G. 70
Freedman, Eli 100
Frurip, David J. 100

G

Gephart, L. 8
Gibson, Thomas O. 209
Grolmes, Michael A. 19

H

Hertel, George R. 100
Hoenig, Stuart A. 119
Howard, Walter B. 65
Huff, J. E. 40

J

Johnson, D. W. 25
Jones, M. C. 200

K

Kaiser, Geoffrey D. 58
Kershaw, R. 73
Kirby, David C. 177
Kletz, Trevor A. 1

L

Latino, Nick 82
Lawrence, Garth M. 33
Leung, J. C. 3
Levy, Leon B. 105
Louvar, J. F. 225

M

MacDiarmid, J. A. 96
Martinsen, W. E. 25
McCloskey, Chester M. 185
McPherson, S. W. 206
Millsap, S. B. 25
Morehouse, Edward T. 80
Moses, S. 8

N

Nightingale, P. J. 29
North, G. J. I. 96

O

Opschoor, G. 234

P

Pantony, M. F. 113
Penrod, James D. 105

R

Rogers, Richard L. 109

S

Schnell, Robert P. 55
Scilly, N. F. 113
Senecal, Joseph A. 147
Sherwood, Robert J. 88
Siwek, Robert 129, 165
Skinner, S. J. 211
Slater, David H. 84
Stepaniuk, N. J. 3
Strickland, J. H. 189
Sullivan, H. C. 195

T

Tabor, David C. 218
Thompson, James R. 92
Trbojevic, Vladimir M. 84

V

van der Berg, A. C. 234
vanWingerden, C. J. M. 234

W

Walker, Joseph L. 80

Titles

A

Advantages and Limitations of Adiabatic Dewar in Chemical Hazard Testing, The.....109
Ammonia Plant Prolonged Operation Between Major Overhauls.....73
Analysis of a Dust Deflagration .177
Anatomy of an Acrylic Acid Runaway Polymerization, The.....105
Applications of Amine Gelling Agents in Fire Technology ...80
Approach to Evaluate the Acute Impacts from Simulated Accidental Releases of Chlorine and Ammonia, An.....8
Assessing Runaway of a Grignard Reaction.....200

B

Building A High-Integrity Ammonia Storage Tank 1988 92

C

Case Histories of Dust Explosions.....211
Columbia Nitrogen's Spill Alert Computer System.....206
Commercialization of an On-line Hydrogen Monitor.....55
Control Structure for Batch Reactor Control.....35
Current State of the Art in Optical Fire Detection, The.....12

D

Deflagration Suppression of High K_{st} Dusts.....147
Design Charts for Two-Phase Flashing Flow in Emergency Pressure Relief Systems.....40
Design Example: Explosion Protection Selected for a Spray Drying Installation.....141
Determining Spacing by Radiant Heat Limits.....25
DIERS Users Group: A Forum for Development/Dissemination of Emergency Relief System Design Technology, The.....70
Dust Explosion Venting for Dusts Pneumatically Conveyed into Vessels.....129

E

Emergency Relief Considerations Under Segregation Scenarios ..3
Explosion in a Nitric Acid Tail Gas Duct.....33

F

Foam Water Sprinkler Protection for Flammable Liquids.....218

G

Good Safety Procedures Can Prevent Accidents: Some Examples.....1

I

Ignition Properties of Mechanical Sparks and Hot Surfaces in Dust/Air Mixtures.....152
Instructional Videotapes on Chemical Process Safety.....225
Investigation into an Explosion that Occurred During a Welding Operation.....29

L

Learning Value From Blown Fuse.....209
Lessons Learned From A Hydrogen Explosion in a Process Unit...96

M

Material Verification and Inspection Program.....88

N

Need for Small Chemical Operators to Know and Use Proper Chemical Process Safety Technology, On the.....65
New Knowledge About Rotary Air Locks in Preventing Dust Explosion Breakthrough.....165
New Release of the ASTM CHETAH Program for Hazard Evaluation: Versions for Mainframe and Personal Computer.....100

P

Preventing Explosions During Chemicals and Materials Storage.....181
Preventing Fires and Explosions in Pilot Plants.....189
Procedures for Preventing Pilot Plant Runaways.....228
Process Safety Evaluation Applying DIERS Methodology to Existing Plant Operations.....19

R

Reducing the Hazards of Dust Explosions: Agglomerate the Fines, Cool Off the Hot Spots, Collect the Fines at the Point of Origin, Neutralize Local Electrostatic Charges.....119
Review of Models for Predicting the Dispersion of Ammonia in the Atmosphere.....58

S

Safe Handling of Organic Peroxides: An Overview.....185
Safety and Loss Prevention Concerns for Engineers in Polymer Facilities.....195
Safety of Exothermic Reactions: A UK Strategy.....113

T

Tank Failure Modes and their Consequences.....84
Training Technology Through Interaction Management.....82

V

Vapor Cloud Explosion Blast Prediction.....234

Subjects

A

Accidental releases, simulated 8
Acrylic acid 105
Adiabatic dewar in chemical hazard testing 109
Amine gelling agents 80
Ammonia
and chlorine, accidental releases of 8
dispersion in the atmosphere ..58
plant 73
storage tank 92
ASTM CHETAH computer program 100

B

Batch reactor control 35
Blown fuse, learning value from 209

C

Chemical hazard testing 109
Chemical process safety, instructional videotapes on 225
Chemical process safety technology 65
Chlorine and ammonia, accidental releases of 8
Control structure for batch reactor control 35

D

Design charts for two-phase flashing flow 40
Design institute for Emergency Relief Systems
methodology 19
users group 70
Dust
deflagration 147, 177
dust/air mixtures, hot surfaces in 152
explosions, reducing the hazard of 119
explosion protection for spray drying installations 141
explosion venting 129
preventing dust ignition breakthrough 165

E

Emergency
relief considerations 3
pressure relief systems 40
system design technology 70
Exothermic reactions,
safety of 113
Explosion
dust explosion 119, 129, 141, 147, 152, 165, 177, 211
during chemicals and materials storage 181
hydrogen 96
in a nitric acid tall gas duct 33
in pilot plants 181
preventing explosions 189

F

Fire
detection, optical 12
technology, amine gelling agents in 80
preventing fires and explosions 189
Flammable liquids, protection for 218

G

Grignard reaction, assessing a runaway of 200

H

Hazard evaluation
ASTM CHETAH computer program for 100
Hydrogen
explosion in a process unit 96
monitor, on-line 55

I

Inspection program, material verification and 88
Instructional videotapes on chemical process safety 225
Interaction management, training technology through 82

L

Loss prevention, concerns for engineers in polymer facilities 195

M

Material verification and inspection program 88
Monitor, hydrogen on-line 55

O

On-line hydrogen monitor 55
Optical fire detection, current state of 12
Organic peroxides, safe handling of 185

P

Pilot plant runaways, procedures for preventing 228
Process safety
evaluation applying DIERS methodology to 19
instructional videotapes for ..225
technology for 65

R

Radient heat limits, determining spacing by 25

S

Safety procedures, examples of ...1
Safe handling of organic peroxides 185
Segration scenarios, emergency relief considerations under 3
Simulated accidental releases 8
Spill alert computer system 206

T

Tank failure modes and their consequences 84
Training technology through interaction management 82
Two-phase flashing flow, design charts for 40

V

Vapor cloud, explosion blast protection 234
